Steelcase

TS Series Storage

AMERICAS

About this product

With a fundamental and clean design, TS Series storage is a hard-working, economical steel base solution that can flexibly integrate into a wide range of Steelcase workspace applications.

The TS Series Storage configurations selected for this study are TS Lockers (TS2LOCKERCUB2B), TS Laterals (TS2File), and TS Pedestals (TS2PBF22MC). They have 10-year service life and 0.15 m^3 of storage capacity.

Date of Issue:	December 20, 2024
Date of Expiration:	December 20, 2029

About this document

This declaration describes the Life Cycle Assessment of the TS Series storage produced for the Americas market by Steelcase Inc. in the United States. The assessment is performed according to the ISO standards 14040 (2006), 14044 (2006) and 14025 (2006), and BIFMA PCR for Storage: UNCPC 3812 to generate an EPD for business-to-business communication.

ASSESSMENT OVERVIEW

EPD commissioner	Steelcase [®] Inc
Corporate Address	901 44th Street SE Grand Rapids, Michigan 49508-7594 United States
Product group	Storage
Product name	TS Series Storage
Product intended use	Storage
Product reference service life	10 years
Reference standards	ISO 14025, ISO 14040, ISO 14044
EPD scope	Cradle to grave
EPD number	EPD11006
Date of issuance	December 20, 2024
Date of expiration	December 20, 2029
EPD type	Product specific
EPD Product Coverage	TS Series Storage for the Americas market
Intended audience	Business to business (B2B)
Year of reported manufacturer data	2023
Functional unit	0.15 m3 of storage capacity for a reference service life of 10 years
Applicable markets/regions	AMER
LCA software and database version	GaBi 10.6.2.9; GaBi database, 2022.2
LCIA methodology and version number	TRACI 2.1, IPCC AR6
Program administrator	NSF Certification LLC 789 N. Dixboro, Ann Arbor, MI 48105 www.nsf.org
Reference PCR and version number	BIFMA PCR for Storage: UNCPC 3812 (BIFMA PCR, 2022)
PCR reviewer	Review Panel Chaired by Dr. Thomas Gloria
EPD reviewer	External review conducted by:

Jane A. Mulla

Jim Mellentine, Thrive ESG

This declaration and its Life Cycle Assessment was independently verified in accordance with ISO standards 14040 (2006), 14044 (2006), 14025 (2006), and BIFMA PCR for Storage UNCPC 3812 (2022).

LCA reviewer

Disclaimer

External review conducted by:

pilles

Jim Mellentine, Thrive ESG The product Life Cycle Assessment was conducted in accordance with ISO 14044 and the reference PCR.

The PCR this EPD was based on was written to determine the potential environmental impacts of a storage product from cradle to grave. It was not written to support comparative assertions. EPDs based on different PCRs, or different calculation models, may not be comparable. When attempting to compare EPDs or life cycle impacts of products from different companies, the user should be aware of the uncertainty in the final results, due to and not limited to, the practitioner's assumptions, the source of the data used in the study, and the specifics of the product modeled.

ASSESSMENT PARAMETERS

Functional unit

 $0.15\ m^3$ of storage capacity including packaging, for a reference service life of 10 years under ANSI/BIFMA X5.9.

Product scope

The products modeled are:

 One lateral with a storage volume of 0.17 m³. To match the functional unit of 0.15 m³, the results in this EPD were scaled down to 0.894 of one TS Series Mobile File Center (box/box/file configuration lateral product number TS2File) with a box/box/file configuration, steel construction with a top cushion, standard locks, with ledge pulls and casters.

- One pedestal with a storage volume of 0.08 m³. To match the functional unit of 0.15 m³, the results in this EPD were scaled up to 1.88 of one TS Series Mobile Pedestal (product number TS2PBF22MC) with box/file drawers, steel construction with a top cushion, standard locking, with ledge pulls and casters; These two products are subcategory 4.4 Mobile Storage.
- One locker with a storage volume of 0.24 m³. To match the functional unit of 0.15 m³, the results in this EPD were scaled down to 0.62 of one TS Series Double Cubby Locker (product number TS2LOCKERCUB2B) at a height of 65.5"H, with a handle pull, and door hinges on the left. This product is subcategory 4.3 Storage Device with Retractable Storage Areas.

Manufacturing location

Ludington, Michigan (lateral file & mobile pedestal) and Grand Rapids, Michigan (lockers)

Assessment goal and scope

The potential environmental impacts of TS Series storage and its packaging throughout its entire life cycle – including raw materials extraction, production, transport, use, and end of life – were assessed. In the absence of primary information, the GaBi database was used for secondary data.

The life cycle stages included in this assessment follow the BIFMA PCR for Storage: UNCPC 3812 September 2022. Material acquisition and pre-processing (including transportation), production, distribution, use and end-of-life are assessed for the storage product.

Assessment boundary

The Life Cycle Assessment considers the full life cycle of the product as described here, cradle to grave. Life cycle stages and phases included in this assessment follow the BIFMA PCR for Storage UNCPC 3812 and are presented in the following table.

		Stage	Status
Â	Cradle to inbound gate MATERIALS ACQUISITION Raw material extraction, pre-processing and	A1. Raw material supply	\checkmark
Transportation. Transportation up to the factory gate and internal transport.		A2. Transport	\checkmark
14	Gate to gate PRODUCTION PROCESS External and internal manufacturing of products, ancillary materials, parts, packaging.	A3. Manufacturing	√
Gate to grave		A4. Transport	\checkmark
		A5. Installation	~
		B1. Use	✓
		B2. Maintenance/cleaning	\checkmark
		B3. Repair	✓
	•	B4. Replacement	\checkmark
끉	DISTRIBUTION, USE AND END OF LIFE Distribution of products, installation, use and end of life.	B5. Refurbishment	\checkmark
		B6. Operational energy use	\checkmark
		B7. Operational water use	\checkmark
		C1. Disassembly	✓
		C2. Transport	✓

		C4. Disposal	\checkmark
	Beyond the boundary	D. Reuse/recovery	

RESULTS: TS Series Mobile File Center

The lateral product composition, packaging composition, recycled content, recyclability visuals, and life cycle impacts below relate specifically to 0.15 m³ of storage space. This study modeled 0.894 units of one TS Series Mobile File Center (product number TS2File) with a box/box/file configuration, steel construction with a top cushion, standard locks, with ledge pulls and casters.

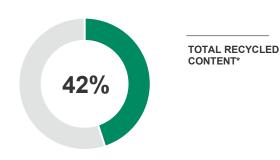

Product composition

Product packaging composition

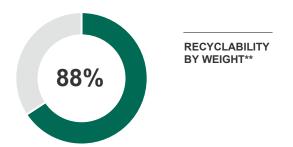

Material	Weight (kg)	Weight (%) Resource Type
Steel	23.418	87.96%	Recycled, Virgin Non- renewable

Total	2.531	100.00%	

Product recycled content* and recyclability** summary

*Total recycled content based on supplier's data. The source of recycled content of various materials could be either post-industrial or post-consumer based on market availability. Excluding packaging.

**Recyclability: this recyclability rate is the maximum amount of the product that is recyclable, based on the availability of recycling facilities in the specified regions and the ability of the product to be disassembled. Note that, per the requirements of the PCR, the endof-life results presented in this EPD were calculated using the US EPA's recycling rates within the 2020 Municipal Solid Waste Report for parts that can be disassembled. Excluding packaging.

Life cycle impact by category and stage

Environmental impacts were calculated using the GaBi software platform. Impact results according to the BIFMA PCR have been calculated using IPCC 6, TRACI 2.1 characterization factors, as well as LCI indicators for primary energy and water usage. Results presented in this report are for 0.15 m³ (0.89 units) of TS Series Mobile File Center maintained for 10 years. Additionally, the results are relative expressions and do not predict impacts on category endpoints, the exceeding of thresholds, safety margins, or risks.

Global warming potential summary

ADDITIONAL ENVIRONMENTAL INFORMATION

Indoor air: Steelcase storage products are certified with SCS's Indoor Advantage Gold[™] program, conforming to the ANSI/BIFMA Furniture Emissions Standard (M7.1/X7.1-2011 R2021) and CDPH/EHLB Standard Method (CA 01350) v1.2-2017. The certification can be found <u>here</u>.

Improper disposal of product: At the end of its useful life, manage Steelcase products correctly in accordance with all applicable regulations for effective end-of-life management, including recycling, disposal, or incineration. Improper management may result in the release of chemicals that may represent a risk to the environment and human health & safety.
