RE: Santi-Wash Hand Soap
Category Code: E2
NSF Registration No. 134659

Dear Mr. Michael Rekhelman:

NSF has processed the application for Registration of **Santi-Wash Hand Soap** to the NSF International Registration Guidelines for Proprietary Substances and Nonfood Compounds (2008), which are available at www.nsfwhitebook.org. The NSF Nonfood Compounds Registration Program is a continuation of the USDA product approval and listing program, which is based on meeting regulatory requirements including FDA 21 CFR for appropriate use, ingredient and labeling review.

This product is acceptable for use as a hand washing and sanitizing compound (E2) for use in and around food processing areas.

This product must be dispensed from adequate dispensers located a sufficient distance from the processing line to preclude accidental product contamination. The hands need not be washed prior to the use of this compound. After the use of the compound, the hands must be thoroughly rinsed with potable water.

This letter is the only confirmation that the formulation complies with the NSF Guidelines. At your request, the product will not be listed on the NSF website. The product's Registration can be verified by contacting NSF directly. Distributors' brands can be sub-registered without disclosing the formulation by having distributors specify the NSF Registration Number in their applications.

NSF Listing of all Registered Nonfood compounds by NSF International is not an endorsement of those compounds, or of any performance or efficiency claims made by the manufacturer.

Changes in formulation or label, without the prior written consent of NSF will void Registration.

Sincerely,

Clifton J. Mclellan
