RE: Multi-Purpose Red Grease HD
Category Code: H2
NSF Registration No. 134723

Dear Mr. Michael Rekhelman:

NSF has processed the application for Registration of **Multi-Purpose Red Grease HD** to the NSF International Registration Guidelines for Proprietary Substances and Nonfood Compounds (2009), which are available at www.nsfwhitebook.org. The NSF Nonfood Compounds Registration Program is a continuation of the USDA product approval and listing program, which is based on meeting regulatory requirements including FDA 21 CFR for appropriate use, ingredient and labeling review.

This product is acceptable as a lubricant where there is no possibility of food contact (H2) in and around food processing areas. Such compounds may be used as lubricants, release agents, or antirust films on equipment and machine parts in locations in which there is no possibility of the lubricant or lubricated part contacting edible products.

Limitation: This product may be used as a lubricant for closed gear systems in which there is no possibility of the lubricant or the lubricated part contacting edible products.

This letter is the only confirmation that the formulation complies with the NSF Guidelines. At your request, the product will not be listed on the NSF website. The product's Registration can be verified by contacting NSF directly. Distributors' brands can be sub-registered without disclosing the formulation by having distributors specify the NSF Registration Number in their applications.

NSF Listing of all Registered Nonfood compounds by NSF International is not an endorsement of those compounds, or of any performance or efficiency claims made by the manufacturer.

Changes in formulation or label, without the prior written consent of NSF will void Registration.

Sincerely,

Clifton J. Mclellan
