Mr. Alfred Hollmann ADDINOL LUBE OIL GMBH POSTFACH 1111 D-06234 LEUNA GERMANY

RE: ADDINOL Cliptec XHS 280 Category Code: H2, HX-2 NSF Registration No. 135634

Dear Mr. Alfred Hollmann:

NSF has processed the application for Registration of ADDINOL Cliptec XHS 280 to the NSF Registration Guidelines for Proprietary Substances and Nonfood Compounds (2004), which are available at http://www.nsf.org. The NSF Nonfood Compounds Registration Program is a continuation of the USDA product approval and listing program, which is based on meeting regulatory requirements including FDA 21 CFR for appropriate use, ingredient and labeling.

This product is acceptable as a lubricant where there is no possibility of food contact (H2) in and around food processing areas. Such compounds may be used as lubricants, release agents, or antirust films on equipment and machine parts in locations in which there is no possibility of the lubricant or lubricated part contacting edible products.

This product is acceptable as an ingredient for use in lubricants with no food contact (HX-2). Such compounds may be used as lubricants, release agents, or antirust films on equipment and machine parts in locations in which there is no possibility of the lubricant or lubricated part contacting edible products.

Formulations containing NSF Registered ingredients are not considered to be NSF Registered products. A separate application is required for each final product. Formulators using NSF Registered ingredients need only identify the trade name, the NSF Registration Number, and concentration within the finished product on the application form.

NSF Registration of this product is current when the NSF Registration Number, Category Code, and Registration Mark appear on the NSF-approved product label, and the registered product name is included in the current NSF White Book Listing of Nonfood Compounds at the NSF website (<a href="http://www.nsf.org">http://www.nsf.org</a>). The NSF Registration Mark can be downloaded from the NSF website, at <a href="http://www.nsf.org/business/about\_NSF/nsf\_marks\_download.asp">http://www.nsf.org/business/about\_NSF/nsf\_marks\_download.asp</a>.

NSF Listing of all registered Nonfood compounds by NSF International is not an endorsement of those compounds, or of any performance or efficacy claims made by the manufacturer.

Registration status may be verified at any time via the NSF web site, at <a href="http://www.nsf.org">http://www.nsf.org</a>. Changes in formulation or label, without the prior written consent of NSF, will void registration, and will supersede the on-line listing.

Sincerely,

Carmen Grindatti

NSF Nonfood Compounds Registration Program
