RE: FORMULA 247-L
        Category Code: P1
        NSF Registration No. 045954

Dear Beverly Berry-Everhart:

NSF has processed the application for Registration of **FORMULA 247-L** to *the NSF Registration Guidelines for Proprietary Substances and Nonfood Compounds (2004)*, which are available at www.nsf.org/. The NSF Nonfood Compounds Registration Program is a continuation of the USDA product approval and listing program, which is based on meeting regulatory requirements for appropriate use, ingredient review and labeling verification.

This product is acceptable for use as a cleaner for boilers, steam lines and cooling systems during shutdown (P1). All traces must be removed from the system before operation resumes in the food processing facility. The product must only be used in such a manner as to ensure it will have neither direct nor indirect contact with food or potable water. Use must also be consistent with the manufacturer's directions and warnings.

NSF Registration of this product is current when the NSF Registration Number, Category Code, and Registration Mark appear on the NSF-approved product label, *and* the registered product name is included in the current NSF White Book Listing of Nonfood Compounds at the NSF website (http://www.nsf.org/). The NSF Registration Mark can be downloaded from the NSF website, at http://www.nsf.org/business/about_NSF/nsf_marks_download.asp.

NSF Listing of all registered Nonfood compounds by NSF International is not an endorsement of those compounds, or of any performance or efficacy claims made by the manufacturer.

Registration status may be verified at any time via the NSF website, at http://www.nsf.org/. Changes in formulation or label, without the prior written consent of NSF, will void registration, and will supersede the on-line listing.

Sincerely,

Carmen Grindatti
NSF Nonfood Compounds Registration and Listing Program
