Novozymes Biologicals, Inc Attn: Helen Harrison 111 Kesler Mill Road Salem, VA 24153

RE Bi-Chem SM 700

Category Code: L2

NSF Registration No. 096654

Dear Helen Harrison

NSF has processed the application for Registration of Bi-Chem SM 700 to the NSF Registration Guidelines for Proprietary Substances and Nonfood Compounds (2000), which are available at www.nsf.org/usda. The NSF Nonfood Compounds Registration Program is a continuation of the USDA product approval and listing program, which is based on meeting regulatory requirements for appropriate use, ingredient review and labeling verification.

This product is acceptable for use as a **Bacterial/enzyme drain and sewer treatment (L2)** for use in and around food processing areas. NSF International must be provided with records of salmonellae analysis for each new lot of this enzymatic cleaner prepared for use in such establishments. Analysis must be conducted by a qualified microbiological laboratory.

If the above condition is not fulfilled, or, if future analysis shows the presence of salmonellae and/or other pathogenic microorganisms, Registration will be cancelled.

This product is NSF Registered when the NSF Registration Number, Category Code, and Registration Mark appear on the NSF approved product label. The NSF Registration Mark can be downloaded from the NSF website, at http://www.nsf.org/mark/download_marks.html.

Registration of compounds by NSF International is in no way to be construed as an endorsement of the compounds, appropriate selection for use, or of any performance or efficacy claims made by the manufacturer.

Registration status may be verified at any time via the NSF website, at http://www.nsf.org/usda. Changes in the formulation or label, without prior written consent of NSF, will void registration, and will supersede the on-line listing.

Sincerely

Kenji Yano, Ph.D.

NSF Nonfood Compounds Registration and Listing Program
