RE: BioSol™ 615
        Category Code: A8
        NSF Registration No. 124429

Dear Kabongo Joachim Bukava,

NSF has processed the application for Registration of **BioSol™ 615** to *the NSF Registration Guidelines for Proprietary Substances and Nonfood Compounds (2000),* which are available at www.nsf.org/usda. The NSF Nonfood Compounds Registration Program is a continuation of the USDA product approval and listing program, which is based on meeting regulatory requirements for appropriate use, ingredient review and labeling verification.

This product is acceptable as a **degreaser or carbon remover for food cooking or smoking equipment, utensils, or other associated surfaces (A8)** in and around food processing areas, where its use is not intended for direct food contact. Use of this product in food processing or handling facilities requires that all food products and packaging materials be removed or protected prior to product use. A potable water rinse of cleaned surfaces is required after use of this product. When used according to manufacturer's instructions, the cleaner shall neither exhibit a noticeable odor nor leave a visible residue.

This product is NSF Registered when the NSF Registration Number, Category Code, and Registration Mark appear on the NSF approved product label. The NSF Registration Mark can be downloaded from the NSF website, at http//www.nsf.org/mark/download_marks.html.

Registration of this compound by NSF International is in no way to be construed as an endorsement of the compounds, appropriate selection for use, or of any performance or efficacy claims made by the manufacturer.

Registration status may be verified at any time via the NSF website, at http://www.nsf.org/usda. Changes in formulation or label, without the prior written consent of NSF, will void registration, and will supersede the on-line listing.

Sincerely,

Kenji Yano, Ph.D.
