RE: BioSol™ DCC
Category Code: P1
NSF Registration No. 124431

Dear Kabongo Joachim Bukava:

NSF has processed the application for Registration of **BioSol™ DCC** to the *NSF Registration Guidelines for Proprietary Substances and Nonfood Compounds (2000)*, which are available at www.nsf.org/usda. The NSF Nonfood Compounds Registration Program is a continuation of the USDA product approval and listing program, which is based on meeting regulatory requirements for appropriate use, ingredient review and labeling verification.

This product is acceptable for use as a **dust control compound (P1)**. Typical applications include dust suppression around the exterior of buildings, parking lots, and gravel roads. This product is not to be used indoors. The product must not directly contact food or food components, and must be used in a manner consistent with the manufacturer's directions and warnings.

This product is NSF Registered when the NSF Registration Number, Category Code, and Registration Mark appear on the NSF approved product label. The NSF Registration Mark can be downloaded from the NSF website, at http://www.nsf.org/mark/download_marks.html.

Registration of this compound by NSF International is in no way to be construed as an endorsement of the compounds, appropriate selection for use, or of any performance or efficacy claims made by the manufacturer.

Registration status may be verified at any time via the NSF website, at <http://www.nsf.org/usda>. Changes in formulation or label, without the prior written consent of NSF, will void registration, and will supersede the on-line listing.

Sincerely,

A handwritten signature in dark ink, appearing to read "Kenji Yano". The signature is fluid and cursive, with the first name "Kenji" and last name "Yano" clearly distinguishable.

Kenji Yano, Ph.D.
