RE: Chevron HTF P 200  
Category Code: HT1  
NSF Registration No. 132206

Dear Ms. Merdona C. Bautista:

NSF has processed the application for Registration of **Chevron HTF P 200** to the NSF Registration Guidelines for Proprietary Substances and Nonfood Compounds (2004), which are available at <http://www.nsf.org>. The NSF Nonfood Compounds Registration Program is a continuation of the USDA product approval and listing program, which is based on meeting regulatory requirements including FDA 21 CFR for appropriate use, ingredient review and labeling verification.

**This product is acceptable for use as a heat transfer fluid where there is possibility of incidental food contact (HT1). The amount used should be the minimum required to accomplish the desired technical effect.**

This letter is the only confirmation that the formulation complies with the NSF Guidelines. At your request, the product will not be listed on the NSF website. The product's registration can be verified by contacting NSF directly. Distributors' brands can be sub-registered without disclosing the formulation by having distributors specify the NSF Registration Number in their applications.

Changes in formulation without the prior written consent of NSF will void registration.

Sincerely,

A handwritten signature in black ink, appearing to read "Carmen Grindatti", written over a light blue horizontal line.

Carmen Grindatti  
NSF Nonfood Compounds Registration Program
