P.O. BOX 16247  
ATLANTA, GA 30321  
UNITED STATES

RE: Whirl  
Category Code: E4  
NSF Registration No. 134656

Dear Mr. Michael Rekhelman:

NSF has processed the application for Registration of **Whirl** to the NSF Registration Guidelines for Proprietary Substances and Nonfood Compounds (2004), which are available at <http://www.nsf.org>. The NSF Nonfood Compounds Registration Program is a continuation of the USDA product approval and listing program, which is based on meeting regulatory requirements including FDA 21 CFR for appropriate use, ingredient review and labeling verification.

**This product is acceptable for use as a hand cleaner (E4) in and around food processing areas. The use of such hand creams, lotions, or cleaners is limited to toilet and dressing rooms. Employees who handle edible products may use such compounds only when leaving the plant.**

Label review was not performed since only distributors market this formulation under their own names. This letter is the only confirmation that the formulation complies with the NSF Guidelines. At your request, the product will not be listed in the NSF White Book™ nor on the NSF website. The product's registration can be verified by contacting NSF directly. Distributors' brands can be sub-registered without disclosing the formulation by having distributors specify the NSF Registration Number in their applications.

Changes in formulation without the prior written consent of NSF will void registration.

Sincerely,

A handwritten signature in black ink, appearing to read 'Carmen Grindatti', written in a cursive style.

Carmen Grindatti
