RE: COMPOUND 340 (POTABLE H2O)
Category Code: G1, G2, G5, G6, Q1
NSF Registration No. 135891

Dear Mr. Edward Morgan:

NSF has processed the application for Registration of **COMPOUND 340 (POTABLE H2O)** to the NSF Registration Guidelines for Proprietary Substances and Nonfood Compounds (2004), which are available at <http://www.nsf.org>. The NSF Nonfood Compounds Registration Program is a continuation of the USDA product approval and listing program, which is based on meeting regulatory requirements including FDA 21 CFR for appropriate use, ingredient and labeling.

This product is acceptable as a compound for the treatment of entire potable water systems (G1) in official establishments in and around food processing areas.

This product is acceptable as a water conditioner (G2) for the treatment of entire potable water systems at concentrations not to exceed 10 ppm calculated as phosphate ion in and around food processing areas.

This product is acceptable for treatment of cooling and retort water (G5) in and around food processing areas.

This product is acceptable for treating boilers or steam lines (G6) where steam produced may contact edible products and/or cooling systems where the treated water may not contact edible products in and around food processing areas.

This product is acceptable for use as a Shell Egg Cleaning Product (Q1). A warm potable water rinse containing an EPA registered sanitizer is required after usage of the product.

NSF Registration of this product is current when the NSF Registration Number, Category Code, and Registration Mark appear on the NSF-approved product label, and the registered product name is included in the current NSF White Book Listing of Nonfood Compounds at the NSF website (<http://www.nsf.org>). The NSF Registration Mark can be downloaded from the NSF website, at http://www.nsf.org/business/about_NSF/nsf_marks_download.asp.

NSF Listing of all registered Nonfood compounds by NSF International is not an endorsement of those compounds, or of any performance or efficacy claims made by the manufacturer.

Registration status may be verified at any time via the NSF web site, at <http://www.nsf.org>. Changes in formulation or label, without the prior written consent of NSF, will void registration, and will supersede the on-line listing.

Sincerely,

A handwritten signature in black ink, appearing to read "Carmen Grindatti".
