Ms. Amy Mc Neilly McLaughlin Gormley King Co. 8810 Tenth Avenue North Minneapolis, MN 55427 United States

RE: PYROCIDE® Fogging Concentrate 5628 Category Code: F1 NSF Registration No. 137608

Dear Ms. Amy Mc Neilly:

NSF has processed the application for Registration of **PYROCIDE® Fogging Concentrate 5628** to the NSF International Registration Guidelines for Proprietary Substances and Nonfood Compounds (2013), which are available at <a href="https://www.nsfwhitebook.org">www.nsfwhitebook.org</a>. The NSF Nonfood Compounds Registration Program is a continuation of the USDA product approval and listing program, which is based on meeting regulatory requirements including FDA 21 CFR for appropriate use, ingredient and labeling review.

This product is acceptable as a pesticide for use in all areas of official establishments operating under the Federal meat, poultry, shell egg grading, and egg products inspection programs (F1). Compounds used at dilutions containing more than one percent synergists must be dispensed as an aerosol spray in edible product areas. Compounds used at dilutions containing more than five percent combined synergists may not be dispensed in edible product areas.

Before using this pesticide compound, exposed food products and packaging materials must be removed from the room or protected. After using this compound, equipment and utensils must be washed with an effective cleaning compound and thoroughly rinsed with potable water before operations are resumed. Before food products may be placed in the area where the material is being used, the area should be sufficiently free of odor to prevent product contamination.

This letter is the only confirmation that the formulation complies with the NSF Guidelines. At your request, the product will not be listed on the NSF website. The product's Registration can be verified by contacting NSF directly. Distributors' brands can be sub-registered without disclosing the formulation by having distributors specify the NSF Registration Number in their applications.

NSF Listing of all Registered Nonfood compounds by NSF International is not an endorsement of those compounds, or of any performance or efficiency claims made by the manufacturer.

Changes in formulation or label, without the prior written consent of NSF will void Registration.

Sincerely,

Carolyn Gillilland
