Ms. Joyce Prindle CH2O, Inc. 8820 Old Highway 99 Southeast Olympia, WA 98501 United States

RE: Activator CH Category Code: 5C NSF Registration No. 152582

Dear Ms. Joyce Prindle:

NSF has processed the application for Registration of **Activator CH** to the NSF International Registration Guidelines for Proprietary Substances and Nonfood Compounds (2013), which are available upon request by contacting NonFood@nsf.org. The NSF Nonfood Compounds Registration Program is a continuation of the USDA product approval and listing program, which is based on meeting regulatory requirements including FDA 21 CFR for appropriate use, ingredient and labeling review.

This product is acceptable for use as a GRAS acid (5C) for the acidification of sodium chlorite solutions in accordance with 21 CFR section 173.325. This product is also acceptable for use as an acid activator (5C) for activating sodium chlorite solutions and generating chlorine dioxide in accordance with 21 CFR section 173.300(a)(1)(i). Use must also be consistent with the manufacturer's directions and warnings.

NSF Registration of this product is current when the NSF Registration Number, Category Code, and Registration Mark appear on the NSF-approved product label, and the Registered product name is included in the current NSF White Book Listing of Nonfood Compounds at the NSF website (www.nsfwhitebook.org).

NSF Listing of all Registered Nonfood compounds by NSF International is not an endorsement of those compounds, or of any performance or efficacy claims made by the manufacturer.

Registration status may be verified at any time via the NSF website, at www.nsfwhitebook.org. Changes in formulation or label, without the prior written consent of NSF, will void Registration, and will supersede the on-line listing. Please contact your NSF Project Manager or nonfood@nsf.org if you have any questions or concerns pertaining to this letter.

Sincerely,

Carolyn Gillilland

Carsyn Gellilleur
