Dr. Paul Salter Axel Royal LLC DBA Royal Mfg. Co. LP 516 South 25th West Avenue Tulsa,OK 74127 United States

RE: Royal Crown Food Grade 3H-350 Category Code: 3H NSF Registration No.158996

Dear Dr. Paul Salter:

NSF has processed the application for Registration of **Royal Crown Food Grade 3H-350** to the *NSF International Registration Guidelines for Proprietary Substances and Nonfood Compounds* (2017), which are available upon request by contacting <u>NonFood@nsf.org</u>. The NSF Nonfood Compounds Registration Program is a continuation of the USDA product approval and listing program, which is based on meeting regulatory requirements including FDA 21 CFR for appropriate use, ingredient and labeling review.

## This product is acceptable for use as a Release Agent (3H) on grills, ovens, loaf pans, boning benches, chopping boards, or other hard surfaces in contact with meat and poultry food products to prevent food from adhering during processing.

NSF Registration of this product is current when the NSF Registration Mark and Category Code appear on the NSF-approved product label, and the Registered product name is included in the current NSF White Book Listing of Nonfood Compounds at the NSF website (<u>www.nsfwhitebook.org</u>).

NSF Listing of all Registered Nonfood compounds by NSF International is not an endorsement of those compounds, or of any performance or efficacy claims made by the manufacturer.

Registration status may be verified at any time via the NSF website, at <u>www.nsfwhitebook.org</u>. Changes in formulation or label, without the prior written consent of NSF, will void Registration, and will supersede the on-line listing. Please contact your NSF Project Manager or <u>nonfood@nsf.org</u> if you have any questions or concerns pertaining to this letter.

Sincerely,

Caron Gillilleur

Carolyn Gillilland NSF NonFood Compound Registration Program Company No: N05988
