RE: Coirloc
Category Code: J1,JX
NSF Registration No. 160713

NSF has processed the application for Registration of **Coirloc** to the *NSF International Registration Guidelines for Proprietary Substances and Nonfood Compounds* (2017), which are available upon request by contacting NonFood@nsf.org. The NSF Nonfood Compounds Registration Program is a continuation of the USDA product approval and listing program, which is based on meeting regulatory requirements including FDA 21 CFR for appropriate use, ingredient and labeling review.

This product is acceptable for use as an absorbent or anti-slip agent for spot application on floors to correct a hazardous condition (J1) in official establishments operating under the Federal meat and poultry products inspection program. Such products may be used in all areas provided that use is limited to the portion of the floor area where the hazard exists and does not result in dusting, tracking, or other objectionable conditions. The product may not be used as a substitute for good sanitation. It must be removed as a part of the routine floor cleaning operation.

Note: Appropriate measures must be taken to prevent exposure to hazardous dust during the application and removal of this product. Such measures may include the use of respiratory protection, ventilation, and other dust control procedures.

This product is acceptable for use as an ingredient in absorbent or anti-slip agents for spot application on floors to correct a hazardous condition (JX) in official establishments operating under the Federal meat and poultry products inspection program. The acceptable use level will vary based on the ingredients in the remainder of the formulation. Most use levels generally used for the purpose in industry would be acceptable.

Formulations containing NSF Registered ingredients are not considered to be NSF Registered products. A separate application is required for each final product. Formulators using NSF Registered ingredients need only identify the trade name, the NSF Registration Number, and concentration within the finished product on the application form.

NSF Registration of this product is current when the NSF Registration Mark and Category Code appear on the NSF-approved product label, and the Registered product name is included in the current NSF White Book Listing of Nonfood Compounds at the NSF website (www.nsfwhitebook.org).

NSF Listing of all Registered Nonfood compounds by NSF International is not an endorsement of those compounds, or of any performance or efficacy claims made by the manufacturer.

Registration status may be verified at any time via the NSF website, at www.nsfwhitebook.org. Please note the letter date reflects most recent product review. NSF utilizes annual verification to ensure no changes have been made to a registered product. Changes in formulation or label, without the prior written consent of NSF, will void Registration, and will supersede the on-line listing. Please contact your NSF Account Manager or nonfood@nsf.org if you have any questions or concerns pertaining to this letter.

Sincerely,

Sarah Krol
NSF NonFood Compound Registration Program
