NSF Nonfood Compounds  
Registration Program

Company No: C0554914

# Certificate of Registration

Servicios y Acondicionadores Industriales S.A. de C.V. (QUIMICA DEL VALLE) has achieved Registration status for DGV 714 to the NSF International Registration Guidelines for Proprietary Substances and Nonfood Compounds (2022) .

## DGV 714

Category Code: G6

NSF Registration No. 161606

**This product is acceptable for treating boilers or steam lines where steam produced may contact edible products and/or cooling systems where the treated water may not contact edible products in and around food processing areas (G6). Food processing facilities are responsible for ensuring that they do not use chemical compounds in a manner that will result in the adulteration of food products. Therefore, it is not expected that the compounds would have to be decharacterized if an establishment document, as part of its HACCP plan, indicates that decharacterization is not needed. Such examples include if data are available to show that low levels of non-volatiles (such as sulfites) will not carry over into steam with the system, or, in the case of cooling water, a functional barrier separates the water from the meat food product.**

This letter is confirmation that the formulation complies with the NSF Guidelines. At your request, the product will not be listed on the NSF website. The product Registration can be verified by contacting NSF directly. Distributor's brands can be sub-registered without disclosing the formulation by having distributors specify the NSF Registration Number in their applications.

Listing of all registered nonfood compounds by NSF International is not an endorsement of those compounds or of any performance or efficacy claims made by the manufacturer.
