

# Certificate of Registration

Thermax Limited, Chemical Division has achieved Registration status for MAXTREAT™ 651 N to the NSF International Registration Guidelines for Proprietary Substances and Nonfood Compounds (2022) .

Nonfood Compounds

Thermax Limited,  
Chemical Division  
Unit No. 1, 903/1  
Jhagadia Mega  
Industrial Estate GIDC  
Bharuch District,  
Gujarat 393110  
India

October 13, 2022

Registration may be verified at

## MAXTREAT™ 651 N

Category Code: G5, G7

NSF Registration No. 166885

**This product is acceptable for treating boilers, steam lines, and/or cooling systems (G7) where neither the treated water nor the steam produced may contact edible products in and around food processing areas.**

**Food processing facilities are responsible for ensuring that they do not use chemical compounds in a manner that will result in the adulteration of food products. Therefore, it is not expected that the compounds would have to be decharacterized if an establishment document, as part of its HACCP plan, indicates that decharacterization is not needed. Such examples include if data are available to show that low levels of non-volatiles (such as sulfites) will not carry over into steam with the system, or, in the case of cooling water, a functional barrier separates the water from the meat food product.**

**This product is acceptable for treatment of cooling and retort water (G5) in and around food processing areas.**

**Food processing facilities are responsible for ensuring that they do not use chemical compounds in a manner that will result in the adulteration of food products. Therefore, it is not expected that the compounds would have to be decharacterized if an establishment document, as part of its HACCP plan, indicates that decharacterization is not needed. Such examples include if data are available to show that low levels of non-volatiles (such as sulfites) will not carry over into steam with the system, or, in the case of cooling water, a functional barrier separates the water from the meat food product.**

This product is exclusively for sale and distribution outside the United States.

Listing of all registered nonfood compounds by NSF International is not an endorsement of those compounds or of any performance or efficacy claims made by the manufacturer.
