NSF Nonfood Compounds  
Registration Program

Company No: C0764390

# Certificate of Registration

Shell MDS (Malaysia) Sdn. Bhd. has achieved Registration status for Shell GTL Fluid G40 to the NSF International Registration Guidelines for Proprietary Substances and Nonfood Compounds (2022) .

## Shell GTL Fluid G40

Category Code: AX, U1, U2, UX-1, UX-2

NSF Registration No. 168784

**This product is acceptable as an ingredient for use in cutting oils for use in machine shops in food processing facilities (UX-2). Formulations containing NSF Registered ingredients are not considered to be NSF Registered products. A separate application is required for each final product.**

**This product is acceptable for use as a surface lubricant used in the manufacture of metallic articles that contact food (U1) as described in 21 CFR 178.3910. The amount used should be the minimum required to accomplish the desired technical effect and shall not accomplish any technical effect in the food itself.**

**"This product is acceptable for use as an ingredient in cleaning products to be used in and around food processing areas (AX) where its use is not intended for direct food contact. The acceptable use level will vary based on the ingredients in the remainder of the formulation. Most use levels generally used for the purpose in industry would be acceptable. Formulations containing NSF Registered ingredients are not considered to be NSF Registered products. A separate application is required for each final product. Formulators using NSF Registered ingredients need only identify the trade name, the NSF Registration Number, and concentration within the finished product on the application form."**

**This product is acceptable for use as a cutting oil for use in machine shops in food processing facilities (U2). The product must only be used in such a manner as to ensure it will have neither direct nor indirect contact with food or potable water. Use must also be consistent with the manufacturer's directions and warnings.**

**This product is acceptable as an ingredient for use in surface lubricants used in the manufacture of metallic articles that contact food (UX-1). Formulations containing NSF Registered ingredients are not considered to be NSF Registered products. A separate application is required for each final product.**

Registration of this product is current when the NSF Registration Mark and

Category Code appear on the product label reviewed by NSF, and the Registered product name is in the NSF White Book™ ([www.nsfwhitebook.org](http://www.nsfwhitebook.org)).

Listing of all registered nonfood compounds by NSF International is not an endorsement of those compounds or of any performance or efficacy claims made by the manufacturer.
